

ACO 22 Series

The LD series of air pumps aerate both nutrient solutions and fish tanks; combined with tubing and air stones fitted to the pumps outlets, they constantly deliver fresh air bubbles to raise and maintain higher levels of oxygen.

Product	Performance l/min	Power Watts
ACO 2201	1.3	1.8W
ACO 2202	1.6	2W
ACO 2204	2 x 2.0	4W
ACO 2206	4 x 2.5	8W

SS Series

The SS/ACO 96 series of super quiet air pumps are ideal for oxygenating nutrient reservoirs or aquariums for optimum health. The non-oil lubricated design of the SS/ACO 96 series produces a large output of purified air due to its high efficiency and compact design. With low power consumption and long service life, energy and costs are saved. With metal outlets, the SS/ACO 96 series allows several processes to be run from the same pump.

Product	Performance l/min	Power Watts
SS3	3.2	2W
SS7	2 x 3.5	5W
SS10	4 x 2.5	10W

ACO 98 Series

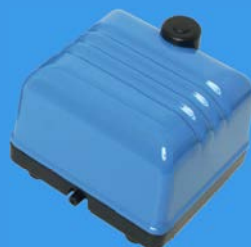

Ideal for driving air through tubing and into air stones at high output, the super silent SSH/ACO 98 series is an ideal air pump for oxygenating multiple hydroponic systems or large koi ponds where great amounts of oxygen are needed.

Product	Performance l/min	Power Watts
ACO 9810	30	25W
ACO 9820	60	35W

V Series

The V series air pumps are ideal for larger hydroponic tanks and aquariums; they allow several air stones to be run from one pump so that a large amount of water can be aerated at one time. The filter cover on each pump can be removed so that clean air can be drawn from outside the grow room or tank house, making them ideal pumps for both aquatic and hydroponic applications.

Product	Performance l/min	Power Watts
V10	10	10W
V20	20	15W
V30	30	25W
V60	60	35W
