

HX Series

The HX series is an excellent way of creating water movement in specific locations. Available in a variety of sizes, they can be placed in areas where oxygenation is poor or where debris collects, alternatively, if using within an aquarium, currents can be created when more than one pump is used.

Product	Power (W)	Flow (L/h)	Hmax (m)
HX2000	10	650	1.0
HX2500	12	650	1.3
HX4500	36	2000	2.8

T Series

Ideal for pond aeration, filter systems or water features, the T series can be used as a submersible pond pump or external pond pump. The T series is suitable for continuous use where reliability is vital and with a professionally designed low power motor, it provides excellent value.

Product	Power (W)	Flow (gph)	Hmax (m)
T5000	64	1215	9.84
T8000	91	2061	11.81
T10000	125	2510	13.12
T15000	220	3857	18.04
T20000	320	4835	21.98
T23000	500	5548	27.88
T25000	580	6341	31.16
T30000	630	7661	27.89
